

8-2 Cyber Playbook Submission

Joshua Merren

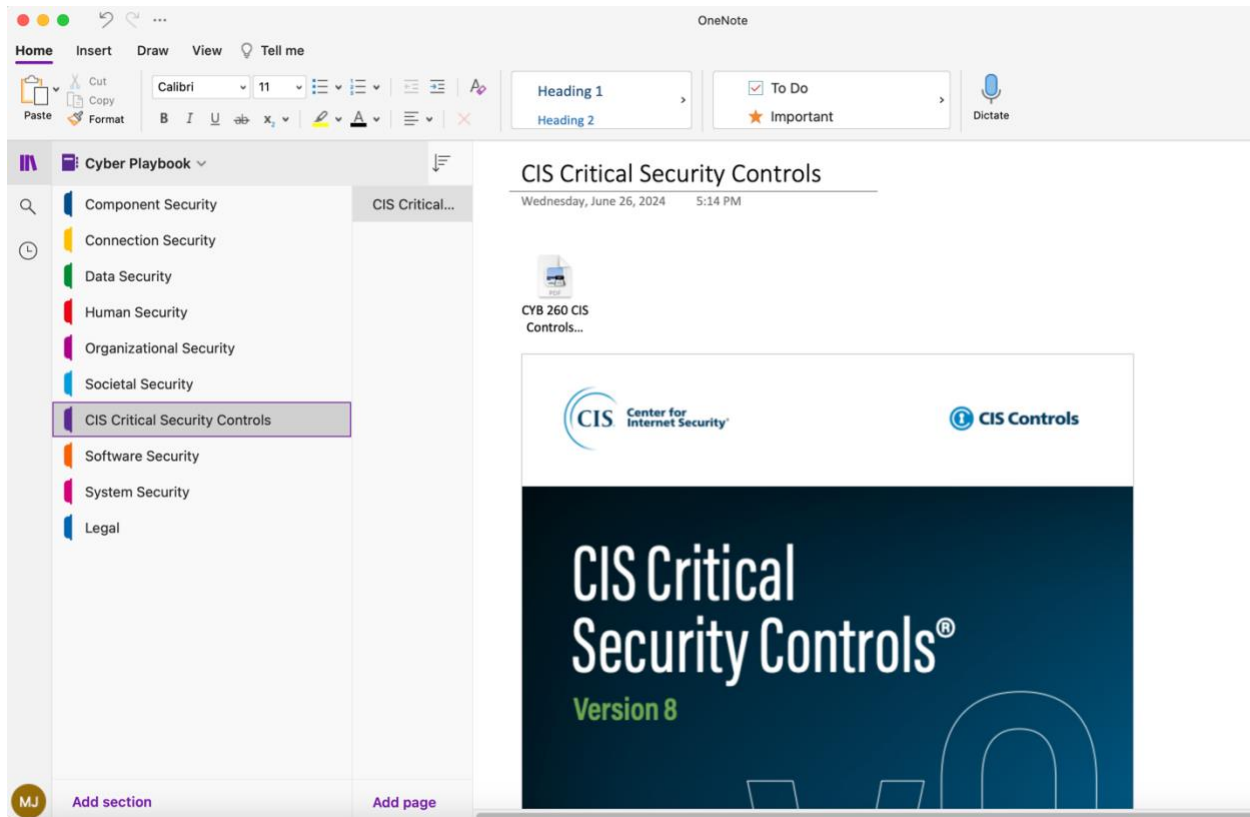

Southern New Hampshire University

CYB-260-11229 Legal and Human Factors of Cyb C-3

Professor Jimmy Harvey

26 June 2024

1. Submit a screenshot of the item that you feel is the most valuable to you (now or in the future) and explain your reasoning.

I believe the CIS Controls Version 8 is the most valuable artifact for my cyber playbook because it offers a comprehensive and updated framework for securing IT systems and data. The controls are prioritized to provide a clear path for cyber defense improvements, which is essential in my pursuit of a cybersecurity career. Implementing these controls can significantly reduce the risk of the most common cyber attacks, making them a critical element of my cybersecurity toolkit.
